

Automated Plagiarism Detection with SafeAssign

Creating an Assignment

1. Navigate to the *Content Area* where the Assignment will be placed
2. On the *Action Bar*, click *Create Assessments* and select *Assignment*
3. On the Create Assignment page, specify the Assignment Name and Instructions
4. Attach additional files as needed
5. Set the Assignment *Due Date* if desired
6. Type *Point Possible*
7. Fill in the *Submission Details*, *Grading Options*, and *Display of Grades*
 - a. Make sure to check the appropriate box next to *Plagiarism Tools* in the *Submission Details* section.
8. Select the check box *Make the Assignment Available*, fill in date to *Limit Availability* if desired, and select *Track Number of Views* if tracking is needed
9. Select the *Submit* button

Create Assignment
Assignments are a form of assessment that adds a column to the Grade Center. Use the Grade Center to assign grades and give feedback to each student. [More Help](#)

AVAILABILITY

Make the Assignment Available
This assignment cannot be made available until it is assigned to an individual or group of students.

Limit Availability

- Display After
Enter dates as mm/dd/yyyy. Time may be entered in any increment.
- Display Until
Enter dates as mm/dd/yyyy. Time may be entered in any increment.

Track Number of Views

Click **Submit** to finish. Click **Cancel** to quit without saving changes.

Submission Details

If any students are enrolled in more than one group receiving the same assignment they will submit more than one attempt for this assignment. It may be necessary to provide these students with an overall grade for the assignment.

Assignment Type

- Individual Submission
- Group Submission
- Portfolio Submission

Selecting this option will require students to submit a portfolio as a response to this assignment

Number of Attempts

Plagiarism Tools

- Check submissions for plagiarism using SafeAssign
SafeAssign only supports English-language submissions. See Blackboard Help for more details.
 If SafeAssign is enabled with Anonymous Grading, SafeAssign Originality Reports will be hidden from Instructors until Anonymous Grading is disabled. However, Students may still be able to see SafeAssign Originality Reports depending on the state of the "Allow students to view SafeAssign originality report for their attempts" setting.
- Allow students to view SafeAssign originality report for their attempts
- Exclude submissions from the Institutional and Global References Databases

When students submit their paper for a SafeAssignment, they will see additional verbiage pertaining to SafeAssign details. They will have the ability to opt-out of having their paper added to the Global Reference Database.

Grading a SafeAssign submission

The grading process works the same as with regular assignment submissions, with the additional SafeAssign report also included.

Below the *Attempt* box you will see the SafeAssign Submission information. Clicking on *View Originality Report* will reveal the details of the plagiarism check.

Grade Assignment: Book Review 2

Assign a grade and feedback for the current assignment attempt. Override the overall grade for the assignment by typing a grade in the grade field. If multiple attempts for a test have been allowed, a Student's grade is not released until all of the attempts have been graded. Click **Hide User Names** to grade attempts with user names hidden. Click **Show User Names** to display user information. [More Help](#)

Comment 1 of 2 Powered by crocodoc

Horizontal stratigraphy was first used in archaeological research in northwestern Alaska by Henry Bt Collins on St. Lawrence Island; however, it was not until nearly 30 years later that J. Louis Giddings fully exploited horizontal stratigraphy's potential in building culture histories and aid site surveys, terming it "beach-ridge archaeology." The rationale of beach-ridge archaeology is straightforward: just as a stratum at the top of an undisturbed vertical stratigraphic sequence is deposited after the strata below it, a beach ridge closest to the body of water is deposited after those farther from the water, creating a series of accumulating ridges if the process continues unabated. While it is possible that people living on the last-formed beach ridge could have used any existing ridge in the sequence, the people who lived on earlier ridges could not have occupied the last-formed ridge

Horizontal stratigraphy was first used in archaeological research in northwestern Alaska by Henry Bt Collins on St. Lawrence Island; however, it was not until nearly 30 years later that J. Louis Giddings fully exploited horizontal stratigraphy's potential in building culture histories and aid site surveys, terming it "beach-ridge archaeology." The rationale of beach-ridge archaeology is straightforward: just as a stratum at the top of an undisturbed vertical stratigraphic sequence is deposited after the strata below it, a beach ridge closest to the body of water is deposited after those farther from the water, creating a series of accumulating ridges if the process continues unabated. While it is possible that people living on the last-formed beach ridge could have used any existing ridge in the sequence, the people who lived on earlier ridges could not have occupied the last-formed ridge While the sequences of beaches and houses in Figure 2 are idealized, two major points should be considered. First, cultural change and stratigraphic change are not synonymous; culture changes at its own rate is independent of stratigraphic change (O'Brien and Lyman 1999:171), or, in this case, of horizontal beach-building events.
